

**1. UVA, UVB and IR penetrate into the skin:**

When UVA, UVB and IR rays penetrate into the skin, they are responsible for the production of toxic free radicals

**2. That is the cause of:**

- ✓ Skin cells alteration (epidermis and dermis)
- ✓ Skin cells DNA alteration (epidermis and dermis)

**3. Consequently:**

- ✓ Skin aging
- ✓ Skin cancers

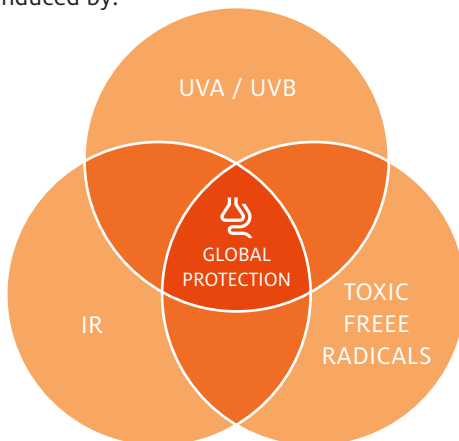

\* UVA are responsible for 80% of all signs of aging on a face.

**4. Remember:**

- ✓ UVA = AGE, SPOTS, ALLERGIES
- ✓ UVB = BURN
- ✓ UVA AND UVB = SKIN CANCERS

**5. How to choose an efficient protection?**

Choose a global protection against the damages induced by:

**Why recommend Laboratoire Dr Renaud sun protections?**

- Every LDR protection is a combination of sun screens / sun filters and exceptional high performing biological protection. Therefore, the skin is better equipped to face the harmful sun radiations.

- Loose powders SPF 50+ are the most convenient sun protections to apply anytime: outside, in the car, behind a window or in front of a screen.
- UV Science 100% mineral, with Venuceane, are the best choice for: Sensitive skin, daily protection, after micro-dermabrasion, laser treatment or depilation.

Optimal  
Advice

Sun protection is mandatory on a daily base. That is because sun damages occur not only on holidays but also the rest of the year, whenever we are exhibited to the sun light.

**Serum C+10 with Uvaxine® Technology**

- Fights the toxic free radicals with 10% Stabilized Vit C under the form of Ethyl-Ascorbic acid
- Prepares the skin to intense sun radiations exposure with Uvaxine® Technology from biological origin

**Serum C+10 with Uvaxine® Technology should be applied daily before a sun protection in order to increase the skin resistance to the UV.**
